T-Card Simplicity with PC Technology

Why Use TeeCards?

Have you ever wanted the simplicity of a conventional T-Card system but with the enhanced functionality of a PC? Well now you can with our T-Card System Software.

The conventional T-Card system has been around for some considerable time, and because of its simplicity and versatility its use has been adopted by many industries: Automotive; Construction; Educational Establishments; Facilities Management; Financial Services; Health & Beauty; Leasing; Logistics; Manufacturing; Printing; Service Management, the list is endless. TeeCards can be used in three different modes, Stacked, Timebanded (for appointments), and Sticky - see illustrations.

TeeCards the Electronic T-Card

Whilst simplicity is a major positive of a conventional T-Card System there are some major negatives for example, cost of consumables, scalability, physical size and location, i.e. only those people in the immediate vicinity of the board can view its contents. Plus as we all know only too well the Cards have a habit of going walkabout. Similarly with a conventional system, a board can only be used for one purpose, where as with TeeCards you can create as many boards as you choose.

The Writing is on the Wall, but it need not be

So to the rescue comes TeeCards, it's T-Cards for your PC. T-Card Simplicity with PC Technology. It takes this simple idea and keeps it simple.

As the underlying information resides on a database and there are search facilities it is practically impossible to lose a card, simply print another. Plus, on a networked system anyone with access to the network can view the board not just your colleagues in the immediate vicinity.

TeeCards Features

- You can create as many Boards as you wish, no more fixing to the wall.
- Each Board can comprise 50 panels.
- Each Panel can comprise up to 100 slots.
- Each Card features 20 customisable fields.
